Compression garments are now an essential training tool for serious athletes. They can assist with the reduction of lactic acid, increase blood flow to working muscles enhancing your performance. You can train harder longer.

SPORTS LOCKER sell the wide range of SKINS compression at 25% off the suggested retail price. Note that's the suggested retail price, unlike some of our competitors who actually sell for more than the SRP. And to think they promote a "Price Guarantee Policy".

You have to be kidding! We know what their price policy is. Sell for as much as you can unless the customers catches you at it.
